The service
External services
each behind an adapter with a fake
Client
web or app
session, request
one uniform body
HTTP API
five public endpoints and two internal ones; any number of instances
SMS vendor
receipt
Push, WhatsApp
App Attest, Play Integrity
Recipient
the number's owner
the code, or nothing
Feedback Loop
the outcome of every send
Pipeline
Steps 0 to 11 on each request
reCAPTCHA
Address intelligence
writes outcomes
reads, takes, reserves
HLR lookup
Store
Redis, or its in-memory twin; every limit, reservation, outcome and statistic lives here
Alerts
timeouts, multipliers
Worker
one per deployment, every minute: resolves timed-out sends, learns the baseline rate
