

(a) service: the hot blocks' users (70 % WhatsApp)

(b) security, 20-minute attack

(c) security, 60-minute attack

Measured (filled markers): mean over five seeds, 95 % interval

no policy, full rate (black solid line with circles) no policy, paced to the quota (black dashed line with circles)
tests, full rate (blue solid line with circles) tests, paced to the quota (blue dashed line with circles)
counter, full rate (green solid line with circles) counter, paced to the quota (green dashed line with circles)

Estimated for the full-rate pumper (hollow markers), from each run's inputs

Eq. 2: tests (blue hollow diamond) Eq. 3: counter, cold (green hollow triangle) Eq. 4: counter, warm (red hollow inverted triangle)
